Subfield Codes

\$a System control number (NR)
\$z Canceled/invalid control number (R)
\$6 Linkage (NR)
\$8 Field link and sequence number (R)

FIELD DEFINITION AND SCOPE

Control number of a system other than the one whose control number is contained in field 001 (Control Number), field 010 (Library of Congress Control Number) or field 016 (National Bibliographic Agency Control Number).

For interchange purposes, documentation of the structure and use of the system control number must be provided to exchange partners by the originating organization. Each valid system control number and any related canceled/invalid control number are contained in a separate 035 field.

GUIDELINES FOR APPLYING CONTENT DESIGNATORS

■ INDICATORS

- Both indicator positions are undefined; each contains a blank (□).

■ SUBFIELD CODES

\$a System control number

MARC code (enclosed in parentheses) of the organization originating the system control number, followed immediately by the number. See Appendix I: Organization Code Sources for a listing of sources used in MARC 21 records.

035 □□ \$a (CaOTULAS) 41063988
 035 □□ \$a (WaOLN) wln7986864
 035 □□ \$a (DNLM) S30545600 (s)

\$z - Canceled/invalid control number

Canceled or invalid control number that is associated with the valid system control number contained in subfield \$a.

035 □□ \$a(OCOLC)814782 \$z (OCOLC)7374506

\$6 - Linkage

See description of this subfield in Appendix A: Control Subfields.

\$8 - Field link and sequence number

See description of this subfield in Appendix A: Control Subfields.
